Adage Fixed Factor | readme!A1:M22

Original

ADAGE Model Output

Date	25/01/2023
Purpose	Conduct sensitivity run with a range of fixed factor elasticity for AFVs, as shown in Appendix B of https://doi.org/10.1016/j.eneco.2023.106710

Scenario	Definition	Shown in the paper
DA	Disaggregated version with AFV	YesAFV

Oil Price	Definition	Shown in the paper
REF	Business-As-Usual	REF
HOP	High oil price	HOP
LOP	Low oil price	LOP

Run	Definition	Shown in the paper
Base	Default elasticity for afv_elas: BEV&HEV: 0.2; GasV&FCEV: 0.1	Base
Twic	2 times of value in Base	200%
3Quar	75% of value in Base	75%
