15 A row header can clear column borders

Source

```
<col min="6" max="6" style="4"/>
<row r="2" s="7" customFormat="1"/>
```

=

Retained by the guard

```
<col min="6" max="6" style="4"/>
<row r="2" s="7" customFormat="1"/>
```

Column style 4 has a border. Row style 7 has explicit borderId=0. Keep the masking row header, including when applyBorder is absent.

Unsafe shortcut. Deleting the empty header exposes vertical column borders across that row.

Abbreviated XML. Style IDs are local.
