## 34 An ineligible majority still wins

### Source

```
<row r="1" ht="9" customHeight="1">
 <c r="A1" s="0"/>
 <c r="B1" s="0"/>
 <c r="C1" s="0"/>
 <c r="D1" s="1"/>
 <c r="E1" s="1"/>
</row>
```

### Decision

```
<!-- Dominant XF 0 wins 3:2. -->
<!-- No row promotion. -->
```

Count all candidate styles before checking promotion eligibility. An unsuitable winning style does not make the smaller eligible group the winner.

Unsafe shortcut. Discarding XF 0 from the counts would incorrectly promote XF 1. Equal counts use the lower style ID, even when unsuitable.

Abbreviated XML. Style IDs are local.
