38 Hidden values can affect visible height

Source

```
<col min="1" max="1" hidden="1"/>
<row r="3">
 <c r="A3" t="inlineStr">
  <is><t>Heading
second line</t></is>
 </c>
</row>
```

=

Retained by the guard

```
<col min="1" max="1" hidden="1"/>
<row r="3">
 <c r="A3" t="inlineStr">
  <is><t>Heading
second line</t></is>
 </c>
</row>
```

A hidden column is not a sufficient deletion guard in a visible automatic-height row. Keep the content that can influence that height.

Unsafe shortcut. Reference checks alone do not protect this local layout effect. Hidden rows and fixed-height rows have separate admission checks.

Abbreviated XML. Style IDs are local.
