46 Unfamiliar cell metadata blocks promotion

Source

```
<row r="1" ht="9" customHeight="1">
 <c r="A1" s="2" cm="3">
  <f>1+6</f><v>7</v>
 </c>
 <c r="B1" s="2"/>
 <c r="C1" s="2"/>
</row>
```

Decision

```
<!-- No row promotion. -->
<!-- Use the normal cleanup path. -->
```

Preserve the original formula/value cell and its nonstandard attributes. The row-promotion look-ahead accepts only its supported cell representation.

Unsafe shortcut. A cheap promotion scan must not silently erase cm/vm metadata, extension attributes or an unknown explicit XF.

Abbreviated XML. Style IDs are local.
